FUTURE CAREER SCHOOL

Career Chart After 12th: Commerce

With and without Maths: BBA, B.Com, CA, law and design routes

Last checked October 2026
futurecareerschool.com

Commerce keeps business, finance, law and design open. Maths decides how many quantitative doors stay open.

Commerce at a glance

Commerce · With or without Maths

- B.Com and BA Economics, then CA, CS or CMA (Scalable with a business layer)
- BBA, BMS, integrated MBA (IPMAT, JIPMAT) (Scalable with a business layer)
- Integrated law: CLAT and other law tests (Not so scalable)
- BCA and data routes (Maths helps) (Scalable)
- Banking, insurance and finance jobs after graduation (Not so scalable)

With and without Maths

Commerce with Maths

- Keeps BCA, data, economics honours and quantitative finance open.
- Strengthens CUET scores in Mathematics and Economics-linked papers.
- Fits actuarial and analytics routes better than commerce without Maths.
- Still lets you register for CA Foundation, CS and CMA.

Commerce without Maths

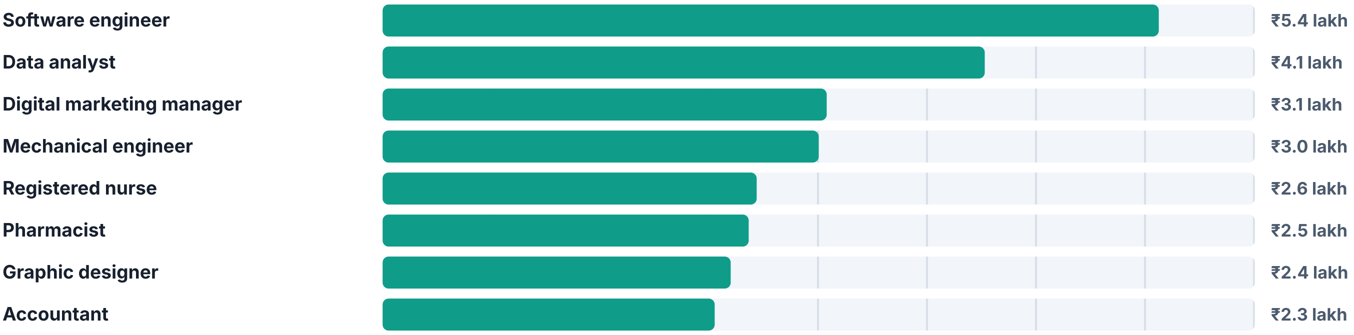
- Not a dead end. B.Com, BBA, law, design, mass communication and CA remain open.
- Check BCA and quantitative degrees college by college. Many ask for Maths or a bridge course; some accept any stream.
- Learn spreadsheets and basic data reading during the degree. That gap is fixable.
- Pair the degree with one applied skill: sales, accounting software, marketing or finance modelling.

Commerce routes row by row

ROUTE	WHO CAN APPLY	ENTRY GATE	LENGTH	PAY SIGNAL (INDICATIVE)	THE CATCH	SCALABILITY AND HOW TO GROW
BCA, BSc Computer Science or data science	Most colleges want Maths or Computer Science in 12th; check each one	CUET UG or a college test	3 years (4 in many four-year honours programmes)	Data analyst fresher pay averages about ₹4.1 lakh	Cheaper than B.Tech, but the degree carries less brand weight, so proof of work matters more.	**Scalable.** Skills can be sold directly as software, dashboards or automation, so income does not wait on a rank or a licence. *To grow: Ship real projects, then freelance or form a small agency. Stack AI use, automation and one business domain.*
Design: B.Des, fashion, interior, UX	Any stream	UCEED, NID DAT, NIFT entrance and college tests	4 years	Graphic designer fresher pay averages about ₹2.4 lakh; a strong portfolio moves it up	Admission tests reward drawing and thinking speed. Prepare a portfolio early.	**Scalable.** Portfolio and skill decide pay, and a designer can freelance, consult or run a studio without a rank. *To grow: Build a portfolio, freelance, then specialise (UX for health or finance, brand identity) and publish case studies.*

ROUTE	WHO CAN APPLY	ENTRY GATE	LENGTH	PAY SIGNAL (INDICATIVE)	THE CATCH	SCALABILITY AND HOW TO GROW
B.Com or BA Economics with CA, CS or CMA	Any stream can register for CA Foundation	CA Foundation twice a year; CS and CMA have their own entry exams	CA usually takes several years with articleship	Accountant fresher pay about ₹2.3 lakh; a qualified CA earns far more	Many students spend years on repeat attempts. Keep a parallel skill running.	**Scalable with a business layer.** A practice can grow into advisory work, but the exam ladder is long and crowded, and many students repeat attempts. *To grow: Add accounting software, data skills and a niche (tax for small firms, finance for startups) beside the exams, and move toward advisory or consulting.*
BBA, BMS or integrated MBA	Any stream	CUET UG, IPMAT, JIPMAT or a college test	3 to 5 years	Wide range. Entry-level digital marketing managers average about ₹3.1 lakh in PayScale profiles and it rises with results	A general management degree without one domain skill produces a generalist gap.	**Scalable with a business layer.** A general management degree is crowded, but a business degree is a natural base for a venture or consulting practice. *To grow: Pick one domain such as sales, marketing or operations, then run a real small venture or consult for local businesses.*
Hotel management and hospitality	Any stream	NCHM JEE or a college test	3 to 4 years	Starts modest in India; grows with promotions or overseas postings	Hours are long and shift-based. Check that the college is approved and offers real placements.	**Scalable with a business layer.** Employment-heavy with long hours, but food, event and hospitality-consulting businesses give a real business layer. *To grow: Build a food, event or hospitality-consulting business of your own.*
Integrated law (BA LLB, BBA LLB)	Any stream	CLAT (roughly 3,600 to 3,700 undergraduate seats across the participating NLUs), AILET, CUET and university tests	5 years	Litigation starts slowly; corporate and compliance roles pay more	Competition happens twice: first the entrance, then the climb to a strong practice or firm.	**Not so scalable.** Competition at every level: the entrance test, then a long climb to a strong practice. Litigation starts slowly and few reach the top. *To grow: Choose a niche early (contracts, startups, compliance, IP), write publicly, and consider legal-tech or compliance consulting beside practice.*
Government jobs: SSC, railways, banks and police	Class 12 pass for many entry-level posts; a degree for others	SSC, railway, bank and state recruitment exams	Depends on the exam cycle	Stable pay and benefits once selected	Many students spend years on repeat attempts. Keep a parallel skill running and confirm each notice on the official site.	**Not so scalable.** Very large numbers sit the same exams, many attempts are common, and seats are few, so consistent study alone often does not lead to a post. *To grow: Keep a parallel skill running and confirm each notice on the official site.*
B.Com or BA Economics with CA, CS or CMA	Any stream can register for CA Foundation	CA Foundation twice a year; CS and CMA have their own entry exams	CA usually takes several years with articleship	Accountant fresher pay averages about ₹2.3 lakh; a qualified CA earns far more	Many students spend years on repeat attempts. Keep a parallel skill running.	**Scalable with a business layer.** A practice can grow into advisory work, but the exam ladder is long and crowded, and many students repeat attempts. *To grow: Add accounting software, data skills and a niche (tax for small firms, finance for startups) beside the exams, and move toward advisory or consulting.*

What the first year pays



Exam dates to note

LAW

CLAT 2027: 6 December 2026

The exam runs from 2 pm to 4 pm in offline mode. Applications opened on 3 August and close on 31 October 2026, so this one is still open.

COMMERCE

CA Foundation: register by 1 January or 1 July

ICAI needs registration on or before 1 January for the May or June exam, and on or before 1 July for the November or December exam, with at least four months of study.

NOT ANNOUNCED

NEET UG 2027, CUET UG 2027 and the next NDA cycle

NTA's calendar for December 2026 to March 2027 does not list NEET UG or CUET UG. NDA II 2026 was held on 13 September 2026. Wait for each official notice before planning around a date.

Test every shortlisted route: 4 checkpoints, then 3 gates

1. **Biology**
   How do you actually work best: abstract study, business thinking, people, or tools and systems? Choose the daily reality, not the label.
2. **Context**
   Marks, money, family situation, school options, commute and emotional readiness. A route right on paper can be wrong for now.
3. **Market**
   Where does the route lead later: real roles, real skills, real progression? Map it forward before you choose.
4. **Survival**
   Will it hold up in an AI-shaped market? Domain skill plus communication, digital fluency and judgment lasts longer than routine work.
5. **Proof of Skill**
   Complete one small real task that resembles the route before you lock it.
6. **Proof of Communication**
   Explain in 30 to 90 seconds why the route fits you, where it leads and what you will test next.
7. **Proof of Value**
   Get grounded feedback from a teacher, senior or professional who does this work, and pressure-test your reasoning.

Your one-page plan

Three routes I shortlisted:

The entry gate and date I verified, and where:

My second route if the exam goes badly:

One small real task I will finish this month:

Two people inside the route I will ask:

Read this first: Seat numbers, exam dates, fees and pay figures change every year and differ by state and college. Use this chart to compare routes, then confirm each date and rule on the official exam site before you act.

About pay figures: Pay figures here are indicative ranges and averages from public profiles, not exact or guaranteed amounts. Pay differs by city, employer, skill and year, and markets change. Check current job listings (for example on LinkedIn, Naukri or Indeed) and ask people working in the role before you decide.

How we rate scalability: We rate a route Scalable when steady learning and a whole-picture approach (skills, proof of work, communication and a little business sense) can grow your income and reach into consulting or a business of your own. A route marked Scalable with a business layer is also a good option for us, as long as you plan that layer: consulting, a studio, a practice or a product. Crowded fields, long ladders of entrance exams and ranks, and careers where very few people reach the top after many years do not count as scalable, so we mark them Not so scalable and list the risk beside them. Well-known routes such as MBBS and BDS, NDA, government exams, integrated law, pilot training, merchant navy and pure research stay in the chart so you can see what they carry, but they are rated Not so scalable. Success there depends on beating rivals at stage after stage, many years pass before pay grows, and few people reach the top. Consistent effort alone does not guarantee a result. If you choose one, write a second route and keep a skill running that can grow on its own.

The route is the base layer. The skill portfolio on top raises your ceiling.
